The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 31 rejected under 35 U.S.C. 103(a) as being unpatentable over APA or Adesida in view of Chen, Wang and Eastman and further in view of Chang, all of record. The previous rejection still applies. The limitation "quantum well" and the recited functional language do not structurally or functionally distinguish over the recited art where the p-doped barrier comprises a "quantum well" and provides the required "function". The p-barrier forms a "quantum well" for holes and a "barrier" for electrons. The claim recitations are broad because "quantum well" is broad.

Claims 37-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-7,11-20 are allowed.

Applicant's arguments filed 4/20/06 have been fully considered but they are not persuasive. Arguments regarding claim 31 are addressed above. As stated "quantum well" is broad and neither structurally nor functionally distinguishes over the applied art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2815

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
